 <b>MARK WALLERSON</b> <b>PRIMARY EXAMINER</b>		Mark E. Wallerson Primary Examiner Art Unit: 2626	

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments are not deemed to be persuasive.

Applicant submits that the cited reference (Maeda) is completely silent on the print acceptance screen having three distinct areas. The Examiner disagrees. Firstly, the Examiner will note that claims 11 and 12 do NOT claim three DISTINCT areas, but merely "a first area", "a second area", and "a third area." Nevertheless, Maeda clearly discloses three [distinct] area on the acceptance screen - a first area (502, figure 6) that allows the user to specify a URL address (server) to acquire print data (a web pull function) (see also column 6, lines 45-48); a second area (505 or 601, figure 6) for a user to specify a given condition to acquire the print data. Column 7, lines 27-37 and figure 7, part 506 disclose that this condition may be the setting of the link level (depth or number of pages) to which the link may be traced. Note that the Screen in figure 7 is obtained by pressing or activating the Print setup button (601) of figure 6. Maeda finally discloses a third area (the Printer Address section, figure 6) to specify a network printer.
